## CONTACT US

## *3-Day Training Outline*

# **CORNERSTONES OF PRACTICAL PROCESS SAFETY MANAGEMENT**

This course will focus on the 14 elements included in the OSHA PSM and EPA RMP Standards. In our three-day course, you will learn from an experienced senior process safety consultant, who will utilize their experiences with a variety of PSM programs to provide you with examples and workshops to help you understand the compliance objectives and how to tailor a PSM program to your facility.

## *Pre-Work*

Background preparation prior to class provides more time for hands-on exercises. Using the provided pre-work materials, each trainee will:

- Review CSB case studies and videos related to specified PSM elements
- Be prompted to think about provided discussion topics that will be presented in class during group activities

## *Day 1*

Importance of Process Safety  
Inherently Safer Design Concepts  
Overview of PSM Elements  
Process Safety Information (PSI)

## *Day 2*
